NTT DATA

Transform Your Business Processes Through Robotic Automation

NTT DATA Automated Full-Time Equivalent

Do you need to reduce the time it takes to perform monotonous, time-consuming tasks? Automated Full-Time Equivalent (AFTE) uses more than 50 vertical-specific and vertical-agnostic tools to automate repetitive, high-volume and rules-based processes.

AFTE can help you improve business outcomes with a full suite of automation tools:

- Optical/intelligent character recognition tool
- NTT DATA Business Process Management Suite automated workflow solution
- Automated web verification solution
- Automated medical coding utility
- Soft dialer engine for voice-based services
- Provider payment posting tool
- Knowledge management tool
- Online idea portal
- Web crawlers
- Process guidance tools
- Smartphone- and tablet-based reporting
- Utilities to converse real-time with automation experts
- Configurable utility that captures repetitive keystrokes
- Six Sigma and process excellence trackers
- AFTE command center

Winner

of the From Good to Great "**Innovation**" award at the 2014 Best Outsourcing Thought Leadership Awards

AFTE also includes adapters and macros that reduce rework and improve straight-through processing.

Utilities include:

- File reconciliation
- Indexing
- Insight document generation
- Data merging
- Multi document viewer
- NT username disabler
- NT username generator
- Automatic copying
- SMS blaster
- TIFF generation
- Invoice wizard

Using an iterative process, AFTE deconstructs work activities by identifying each micro-step and creatively reconstructs each activity using a combination of automation techniques.

- Increase efficiency
- Improve accuracy
- Improve speed to market

AFTE can help you

- Comply with industry regulations
- Enable 24x7 workflows
- Reduce costs
