NTT DATA | **vm**ware®

Create a safe, resilient operating model for your anywhere, anytime workforce with NTT DATA and VMware.

The typical boundary between our professional and personal lives is gone forever. In its place is a distributed workforce model that includes modified physical workspaces, expanded work-from-home options, virtual operations and a choice of devices with no-touch provisioning and cloud management.

NTT DATA and VMware have the technology and services you need to deliver an engaging employee experience, boosting user productivity and delight. With a user centric approach we build, deploy, and manage a distributed workforce allowing your employees and customers to collaborate in new and better ways.

Persona-based experience | Intelligent automation	VMware Workspace ONE Intelligence

*Available on Microsoft Azure

Workspace as a Service/VDI

Virtual desktop infrastructure is an important strategy to create secure access to a complete work environment from anywhere, while reducing the organization's hardware requirements. NTT DATA and VMware deliver cloud-hosted, fully managed virtual desktop infrastructure (VDI) and virtualized applications. Virtual desktops and/or applications are hosted on VMware Horizon from NTT DATA data centers and managed by NTT DATA experts.

Benefits

Effortlessly scale to meet your business continuity goals and market demands.

Reduce day-to-day desktop management that allows IT resources to focus on strategic business needs.

Support a wide range of devices and thin clients, plus many older PCs to enable VDI access.

Unified Endpoint Management

The traditional office has radically changed. Employees are now collaborating across locations, devices and time zones. NTT DATA and VMware Workspace ONE and VMware Carbon Black help your users experience a seamless workplace with the flexibility to work anywhere, anytime on any device with secure access to their data and applications. Deploy modern device management for corporate and personal devices for better control and real-time visibility. Leverage cloud management platforms for multiple desktops and mobile operating systems with enhanced security and privacy at every stage of the device lifecycle.

Benefits

Make users highly productivity with choice of devices and applications.

Protect business data and devices with enterprise grade security management.

Gain immediate visibility and control over the entire fleet of devices connected into your corporate network.

Lower total cost of operations through industrialized automation across the entire device lifecycle.
