

# NTT DATA

## Smart, Demand-Driven Decision Making for the Entire Healthcare and Life Sciences Supply Chain

By enabling end-to-end digital transformation, you put patients at the center of the supply chain.

With a fully integrated supply chain powered by demand-driven decision making, you can:

Increase focus on serialization, security and quality

Gain visibility into global inventory management

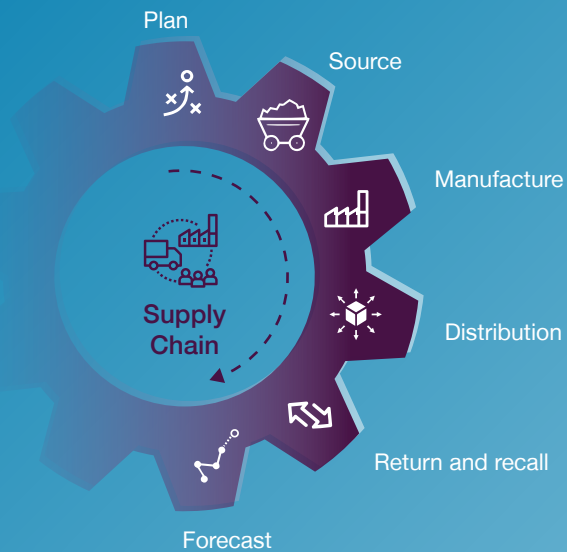

Focus on personalized medicine

Enable data integration, analytics and cybersecurity

Use GPS, RFID and sensor for real-time monitoring and chain-of-custody tracking

### Partner with NTT DATA to enable patient-centered care through supply chain solutions, including:

#### Digital

- Connected sensors
- GPS
- RFID
- Blockchain
- Mobility and tracking

#### Cloud

- Hybrid cloud
- Serverless systems
- Private cloud
- APIs
- Microservices

#### Big Data

- Predictive analytics
- NoSQL databases
- In-memory data fabric
- Data virtualization
- Data integration

#### Advanced Analytics

- Machine learning
- Natural language processing
- Neural networks
- Deep learning

#### Robotic Process Automation

- Robot apps
- Bot farm
- Unit process bot
- Bot insight
