Global Innovator

## Inside the NTT Booth at Gartner Symposium/ITxpo

At Gartner Symposium/ITxpo 2018, NTT is exhibiting advanced technology supporting services and use cases in the six key areas driving digital transformation:

- Cloud Computing & Security
- Business Intelligence & Data Analytics
- People, Culture & Work
- Cost Optimization & IT Modernization
- Emerging Technologies & Innovation
- Customer Experience

NTT will also be conducting in-booth presentations on these topics throughout the event. For information on the presentation schedule, please visit booth #337.

## NTT Speaking Sessions

### SPS21: Data Defined. The Good, the Bad and the Ugly!

Speaker: Shamlan Siddiqi, Chief Technology Officer, NTT DATA, Inc.

Date: Monday, 10/15 | Time: 3:15pm - 4:00pm | Location: Room 9

Like it or not, individuals are increasingly in the driver's seat when it comes to managing their personal data. Data intelligence, analytics, control and privacy/security are not only of paramount importance to businesses and governments, but to consumers too. As we enter the fourth industrial revolution, we as a society are at an inflection point — how do we maximize, harness and protect our data? This presentation will provide an overview of the state of the data economy in an opt-in era and what's ahead as we create change for meaningful and personalized insights with predictable outcome.

### SPS56: Leveraging the Cloud to Disrupt Public Utilities & Tolls

Speaker: Drew Clarke, Director of Technology, ETAN Tolling

Date: Tuesday, 10/16 | Time: 3:45pm - 4:30pm | Location: Room 8

You may not know ETAN Tolling, but you've likely paid for toll roads or utility bills via their systems. Learn how ETAN is disrupting the tolling industry (cable, telecom, highway tolling & utilities) by leveraging cloud-based services and software-defined transactions to bring exponential improvements to collecting tolls and displacing the old guard as central actors. ETAN's systems leverage mass computation and software-defined connectivity to bring improvements in transaction processing, knowledge and forecasting at exponential rates for the entire customer lifecycle – all via the cloud.

## A Family of Industry-Leading Brands

NTT brings together best-in-class organizations, each of which holds a leadership position in its area of expertise:

### NTT DATA

NTT DATA partners with clients to navigate and simplify the modern complexities of business and technology, delivering the insights, solutions and outcomes that matter most. We deliver tangible business results by combining deep industry expertise with applied innovations in digital, cloud and automation across a comprehensive portfolio of consulting, applications, infrastructure and business process services. NTT DATA is a top 10 global business and IT services provider with 118,000+ professionals in more than 50 countries. Learn more at [nttdataservices.com](http://nttdataservices.com)

NTT Communications solves the world's technology challenges by helping enterprises overcome complexity and risk in their ICT environments with managed IT infrastructure solutions. These solutions are backed by our worldwide infrastructure, including industry leading global tier-1 public and private networks reaching over 190 countries/regions, and more than 400,000 m<sup>2</sup> of the world's most advanced data center facilities. Our global professional services teams provide consultation and architecture for the resiliency and security required for your business success, and our scale and global capabilities are unsurpassed.
